Abstract

The advancements in artificial intelligence (AI) is focusing let every aspects of tasks be carried out by AI Robotics and people relax enjoy life in meditation, amusement and dancing etc. There has been quantum leap in computerization in the world. Present day's computers created by human mind, bring sentimental advances and fail to do tasks of biological subsystems. One needs to realize that mind governs biological ecosystems, which is beyond capability of any computer machine created so far. As per such logics the AI enabled robots cannot conceive to produce real biological world. A scientific analysis for the most advanced in computerization country Japan became confirmatory case study revealing population of aged people has surpassed population of new generations and likewise many other countries of the world. Thus, it became clear that advantages and disadvantages go side by side in any situation; implicating the blind trust of accomplishing everything by computers. This study is taking up aspects beyond capabilities of any artificial intelligence devised robots, which are being poised as machine doing all sorts of works without any liabilities. Previous studies of this author advanced the XX-XY male female gender theory after elapse of one and a quarter century of its discovery by Mc Lund on grass hoppers in 1902 and further advanced by Wilson and Stevenson in 1905 on protenor. It was established that aberrations in the original discovery of referred gene theory faded the scientific outlook, which got over taken by blind believes making people forget the gene theory. This innovative development research acquired corollary of Sir Issac Newton's discovery on development of law of gravity. The research brought many insights which enable makeup the gender misbalance by prismatic human biology as well as overcome several genetic ailment and health improvement issues. Studies had equipped world overcome hunger and produce sufficiency of the food for living to make remain in comfortable situation for all time and the world remain sustainable.

Keywords: Artificial intelligence, Gender misbalance in , Genetic disorder and cures issues, Computerization, Flourishing of affluence and Population revamp man oeuvre,

Introduction

These days there is undue thrust on artificial intelligence leap [1]. This news write-up portrays also creating image that artificial intelligence is going to solve all worldly problems, which is product of unclear mind. It needs sound scientific backing for such clarifications and in absence of this provoked claim for such things will be detracting leading to mis

judgment of things. The computers have lot of limitations and it provides lot of misuse of its advantages, which need equal compatible focus.

The computer has strong limitations that it cannot conceive to produce real biological world. Initially the bio systems were based on watching and comprehending only based opinion

formations. Genetic theory appeared one and a quarter century back Singh [2]. There occurred many atrocities on women and female children as elaborated by Savitri Bai Phule. The author studies the aberrations in the aforesaid gender theory as pondering situation [3]. Prismatic gender biology was innovated. Advancements in biological worlds were brought for developing good balanced family child development [4] and development of bad personality which create problem of law and order [5]. The biological systems has produced avenues for bring sustainable food and nutrition [6,7] sustainable world, which cannot get done by ai leap. Objective of the present study was to substantively bring such establishing fact relieving mistrusted opinion from mere AI leaps [1]. The objective of the present study is to bring sound justification and substantiating facts to save misguidance in computerization and AI leap.

Materials and Method

Function of the Computerization and AI Leap

The computers carry out jobs faster than human mind. The mind s intelligence will guide the human bodies some direction, but it can not perform functions body organs functions. Actually these organs, which acts as an ecosystems also perform many biological body functions other than minds. Hence computers will not able to conceive and produce biological real world. This aspects need sound considerations and such details are brought in the result part of the study.

Prismatism in Bio Systems

The author has made plausible advance ment in bringing Godly solution in creating prismatic gender balancing human and biological sciences by bringing prismatic gender balancing in the gender theory which was discovered in 1905 [2]. There had been atrocities on women and girl children atrocities. A new prismatic family gender balancing was innovated that makes true and actual empowerment of women and girl children [4]. This aspect will be presented in result part of the study.

Case Study Validating the Proposed Hypothesis

The situation that computerization can do everything and other things will automatically get accomplished was verified by taking a case study of highly advanced and computerization country Japan [5]. The study made very exact representation of example elaborating how worse situation will develop in eccentric mere AI leap. Full interesting informations will be presented in result part of the study.

Balanced Development for Sustainable World

The study was brought to situation that a balanced development for building a real biological world for human welfare and auxiliary such bios parallel ecosystems will be necessary. Such balanced world will be accomplished by enforcing concept of ecology and ecosystems services in any given space viz environment be country, district or a family. This result will also be taken up in result part of the study.

New Advancement in Implanting of Computer Chips in Human Mind Bringing a Changed World.

Alon Musk company placed a device in patients brain and this product is called telepathy. will allow a human to control a phone or computer, is the most recent advancement in AI leap [8,9]. Detailed deliberations will be taken up in result part of te study [8,9,10].

Human Mind is Stronger than AI Opined by Narayan Murthy: Founder of Infosys Company

Narayan Murty founder of Infoys Company opined in general concern of people that AI will reduce employment opportunity dis approved the prevailing worryful scenarios. This fact will be brought in result and discussion part of the study [11, 12]

Results

Capabilities and limitations of AI leaping Situation

The reference [1] emphasizing AI leap has over emphasized benefits of task. This needs elaborations in various aspects, which accomplished in Table 1.

S.No	Aspecy	Real ity	Situation with study	Remark
1	Human mind itself is computer	True	Universal fact	Advantages of computerizations
2	A computer is simply a tremendous instrument	Accepeced fact	Highly useful	
3	A computer can produce scientific more real scenarios	Accepted fact	Highly useful	
4	It can do real scientific intellectual, intelligent and mental work	Accepted fact	Highly useful	
5	It can analyze senti-ment/opinion based data	A developing scenario	Highly useful	
6	It accepts any instruction to perform desired task	Creating good as well as bad tasks	Highly useful as well as destructive	

Limitations				
7	AI built robots cannot conceive to produce real biological world	A true fact but not realized	Strong limitation	Computers' limitations task cannot get accomplished as brought by advancements in Biological sciences
8	Computer tasking will solve any worldly problem	It creates tremendous problems of scam and frauds	Most problematic use creating problems	
9	Highly manoeurable for misusing by selfish mind in thieves	Ban frauds and deep faking were highly affecting mis use	This has been the undesirable task appearing due to computerization	
10	Blind follow up of computer is disastrous	True	This study will prove the fact	

Table 1 Gains and disadvantages limitations accompanied by computer based artificial intelligence leap

A computer being tremendous machine can perform speedy voluminous tasks and mental and intelligent task. It is highly maneuverable. Reliance that computer can do everything solving world problem is highly disastrous. Such trusts can become a disastrous dumfounding task. These aspects will be substantiated

Advances in Gender Theory

Aberrations lead revelation of many insights with adequacy of its research data, authenticity and its novelty acquiring acceptance of approach and sufficiency of research approach and data on the development for publications in J of Surgery and Case studies, California, U.S.A. in 2021. Subsequent additions and deep case by case lead to elaborations of issues on utility of the revelation for developing male head hair fall leading confirmatory impact of severe night time stomach acidity, This study progressed on making use of revelation and lessons from the study in bringing prismatic family:

Who makes decision to have children? Couples child bearing intensions of further development of second and third child bearing in the most advanced country Switzerland giving equal opportunity to both male and female children in accomplishing acquiring desirable outcome.

Aberrationled Health and Ailment Issues

The xx-xy female male gender system aberrations and developing bad scenarios bringing setback to wellness of father and mother: Unimaginable grave consequences of xx-xy aberrations that happened with case listed in the study Aberrations An ideal way to enforce population control policy and Application of lessons in rehabilitating disabled offsprings from both male and female genders due to aberrations. which all constitute part I of document on aberratio3.4

Food and Nutrition in Revamping Freedom from Cures

Further, study produced the, food and nutrition of rice based innovative food, of almost 50 % of global gentry: making new transformations of forestry horticulture: exploratory study on development of fruits, nuts, herbs, gums and resins from weak or barren land lying under forestry land use and trans-

forming Forestry –Horticulures enhancing utility of the forestry land use systems, spreading in geographical areas occupied by global countries.

The second study derived from observing situations of different life styles of night watchmen who remain awake and keep taking some snacks thereby reduction in peak of acidity and long time loading forming reason of ailments. This study lead to development of different life style, which causes development of bald head and ailments. The study established that high stomach acidity implicating aberrations of developing only female child which renders family remain gender mis-balanced. and no one take care under actual developing situation with well life style of parents at later stage of become super senior citizen. Such makeups are bot possible for any adavancemant in the provoked AI

Medical Advisory of Gynecological concern

The study developed measures that everyone should take care right after marriage, which usually not cared for due to sociological pseudo provoking of no difference of any genders it was considered as mereGod's grace. This situation developed even in the most developed country Switzerland giving equal opportunity to either gender children. In such developed country the gentry evolves by its own course of unplanned management as there existed no simple way to bring any prismaticity. This study has developed chapter of developing primaticity in family development, regulating populations and even having effective control measure on over-coming development of disabled offsprings form either father or mother having one or other kind of disabilities.

New Innovative Ecological Transformation for Feel good and Wellness Prosperity

The Forestry horticulture to produce fruits, nuts and herbs including gums and resins for use in bringing feel good and wellness for fulfilling global large demand. Such developments are realizable at later stage, where almost all developing countries are concentrating their endeavors of acquiring food security. This new wisdom serves as a new guide line

to easily bringing developing countries at par with developed country, without loss of time and without any constraint in execution and implementation of innovative lessons developed in this document. The last chapter of part II of the document is bringing plentiful prismatic natural resource in bringing highly healthy and prosperous new world. Thus, this document present the most plausible wow research in bringing prismatic development of family, global population and plentiful natural resources with existing geographical areas with global countries. Therefore, this research brings a prismatic real world with health and wellness with surplus prismatic natural resources, without any limiting constrains of implementation and execution. Appendix Table contains all case studies in the document supporting various aspects and issues as well enlarging case studies with time as it becomes available.

Human Mind is Stronger Than the AI

The AI was brought by the human mind. It got developed by mind power using electronics. On the other hand there had been tremendous bio advancements bringing new ventures of fulfilling human needs. As brought out, the AI cannot produce food, although it can accomplish hard risky jobs, where biological systems get restrained. Thus, AI can supplement bio system in bringing better world than the existing one. It is needles to bring here that mere AI will not make the sustainable new world.

Discussion

Jaan hai Jahan hai (When one is alive there is world otherwise nothing)

The World can be understood in comprehensive way by considering geographical space constituting environment, having three dimensions (L, W, H) ie L3 . The world gets occupied by entities both alive and non alive forms ecology. When a new dimension of time T is added in space it form the ecosystems and parallel network of sub systems (Oliff et al, 2009 [13]. It will involve lot of debate to prove where to place the AI in the ecosystem. Nevertheless,, it is proven fact that it is a tool or technique, which can be useable in accomplishing difficult work with speed. It cannot produce any natural bio product insense not as originator, leaving aside as tool and technique. Hence, whatever wonderful developments are provoked in favour of the AI will have meaning for one , when one remains alive, there is world, otherwise it is nothing. This universal and always true fact proves superiority of prismatic gender balancing, which is a Godly solution in bringing sustainable World.Thus, wisdom lies in making integrated and supporting use of AI in fostering cause of new world. Yadav 2024 (14) broght newinitiative to a new bring balanced family, maintain sustainable legacy which will produce multiple benefits. This intiative will bring new wonderful world, where comptterizatio leep will supplemrt.

Conclusion

This study reached to conclusion on new advancements of XX-XY female - male gender theory, which got faded by resulting aberrations. In the deep case by case study lead acquiring insights of bringing prismaticism in human biology and human gentry overcoming many unknown bio-factors. The study equally supported by prismatic natural resources for harvesting feel good and wellness to foster prismaticism in human biology and plentiful prismatic natural resources prosperity of gentry and wellness with existing geographical areas with global countries. Thus, provocation of AI doing everything will not be possible. The AI and Bio advances should go hand in glove to bring better world.
